

# Isle of Man Friends of the Earth CO<sup>2</sup> Calculator

Isle of Man Friends of the Earth

## **Name of company**

## **Contact person**

## **E-mail**

## **Telephone**

We use Climate Care's carbon calculator to assess your business' carbon footprint. Their business CO<sup>2</sup> calculator makes it easy for any size of UK based organisation to work out and offset their key CO<sup>2</sup> emissions.

## **Reporting Period**

What month/year are you reporting from (inclusive)?

What month/year are you reporting to (inclusive)?

## **Your office energy**

Please tell us about the energy your business has used for the reporting period using either of the two methods below.

### *Either*

Tell us about the amount of energy you used over the reporting period

Gas                      KWh

Electricity              KWh

### *Or*

If you are an office-based business, you can estimate the CO<sup>2</sup> using your total office floor area.

Which of the following best describes your building?

Not air conditioned, cellular

Not air conditioned, open plan

Air conditioned, standard

Air conditioned, prestige

Tell us how large your floor area is:                      m<sup>2</sup> or                      sq. ft

## **Company flights**

Please add details about your air travel data in this section. If your business takes more than 10 flights a quarter, you may wish to contact [business@climatecare.org](mailto:business@climatecare.org) to discuss setting up a regular reporting system to calculate and offset your CO<sup>2</sup> from air travel.

We can work out the CO<sub>2</sub> from your flights using the following data:

Tonnes CO<sup>2</sup>                      Tonnes

Or hours flown                      Hrs

Or distance flown                      miles, or                      kilometres

**Other Company Travel**

|                              |           |            |
|------------------------------|-----------|------------|
| Distance of petrol cars      | miles, or | kilometres |
| Distance of diesel cars      | miles, or | kilometres |
| Distance by public transport | miles, or | kilometres |

**Extra Carbon**

Extra carbon to offset                    tonnes

**Next Steps**

We will calculate your emissions using the carbon calculator developed by our friends at Climate Care, which is available on their website at <https://www.climatecare.org/calculators/business>

You may prefer to do this yourself – having collected the data above.

Information about the cost of offsetting your emissions can be found on their website: [www.climatecare.org](http://www.climatecare.org)

- Direct offsets through Climate Care will go to fund excellent projects overseas.
- Information about paying to directly offset your CO<sup>2</sup> emissions on the Isle of Man can be obtained from the DoLGE Energy Officer Peter Longworth ([peter.longworth@gov.im](mailto:peter.longworth@gov.im))
- If you would like to contribute to *environmental enhancement* on the Isle of Man, rather than direct carbon offset projects (e.g. tree planting), please contact ffinlo Costain ([ffinlo@ffinlo.org](mailto:ffinlo@ffinlo.org))

**Many thanks for your time.**

**Contact ffinlo Costain for more information: 400 193 or [ffinlo@ffinlo.org](mailto:ffinlo@ffinlo.org)**
